## FOR IMMEDIATE RELEASE

### Facilities History Feature Added to Aerie Engineering's Document Management System

*September 27, 2011*

**Greenville, SC** – Aerie Engineering has added a new feature to its AerieLib Document Management System. Clients can now view an electronic map of their facilities, click on a building and see a history of the construction, renovations and significant events for that building.

According to Jim Kelly, Director of Plant Operations and Maintenance at Self Regional Healthcare, Greenwood, SC., "Having our facility drawings and building history in one online system is a tremendous asset. We can easily get to drawings as well as general building data, such as square footage, type of construction, year built and relevant historical events in the life of the building. Anytime we need information related to our buildings, we can find it in AerieLib."

Aerie Engineering is a responsive and flexible engineering services firm that offers a range of technical services that include Web-based Document Management Solutions, Knowledge and Management Solutions as well as an array of technical solutions including CAD Machine Design & Drafting, Technical Writing, Staffing and Project Management.

Aerie Engineering has been serving manufacturers, schools, and hospitals in the Carolinas and Georgia since 1998.
